

MIDWAY AGGREGATE SPREADER

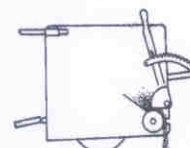

3 Operator's Platform runs full length of spreader. Detaches and stows away quickly for transporting.

4 Traction Wheels - 8-ply, 6:00 * 14 tires. Provides flotation for easy towing and maneuvering in tight turns. 4 wheels on 8' and 9' models when 6 wheels on 10' and 12' model. Balance Rollers facilitate hitching unit.

5 Agitator is designed with tapered right and left spirals to carry both ends of hopper for even spreading. Clutch and manual control engages or disengages auger as desired while on the go.

6 Single Shift Lever for forward, neutral and reverse operation. Lever controls agitator and feedroll. Shifts automatically to neutral in case of shifting error.

Quadrant - Type Feed Gate follow a true arc when opening or closing, and does not swing against weight of material in hopper.

Block-off Plates (optional) for control of spread. Optional block-off plates let you spread from 1 foot to max. width.

Features:

- 1** Spreader is provided with "Quick Hitch" attachment hook up to utilize one or more trucks in continuous operation. Simple, spring-loaded release facilitates shutting trucks during continuous operations.
- 2** Large 5 1/2" O.D. spiral grooved FEED ROLL for even spread and friction metering of material. Left and right spirals insure positive feed.
